COMPANY BACKGROUND

The company was founded on the principles of taking pride and bringing justification to whatever we do. We accomplish this objective by applying the right attitude and maintaining professional integrity in all that we are entrusted with. Our aim is to fulfil and exceed the expectations of our clients. Clients in the built environment and Engineering sector aspire sound professional advice, outstanding project management and to see their developments being delivered at high quality standards. Our wealth of experience and quality management systems allows us to meet these requirements. Our Earned Value Management and stakeholder relation approach is unique and outstanding. We inspire collaboration, integrity and transparency in delivery of well acceptable quality products.

ABOUT

Our Earned Value Management and stakeholder relation approach is unique and outstanding. We inspire collaboration, integrity and transparency so as to deliver well acceptable quality products.

CORE VALUES

Collaboration - with the stakeholders by working well together to inspire

Transparency - by opening up our inner workings to the client to promote

Integrity - where when all is in the open then imbalanced and inefficiency is illuminated and therefore

Quality - work will be delivered living the End User satisfied with both the client and Consultants involved.

VISION

To form and maintain, reputable and dependable partnerships which will offer best in class consultancy and project delivery services across the engineering and building sector.

MISSION

To inspire collaboration, integrity, transparency so as to deliver high quality standard and successful projects.

OUR SERVICES

Our well-balanced experience in cost engineering and property developments of varying scales and complexity, spans across many sectors such as retail, commercial, sports, leisure and hospitality, factories and warehousing, residential, transport, educational, health, facilities management, engineering and mining.

- Quantity Surveying Solutions

- Procurement Values
- Early Project dispute detection and Resolution
- Project Management Advice
- Project Rescue

MANAGEMENT & EXPERIENCE

APPROACH

Whether we are working on small, bespoke works, or a large-scale projects, our focus is on setting the standard for construction services. Central to this is our commitment to consistency which helps us to deliver our projects to a great standard for our customers, regardless of their building type. That is why our clients trust us to deliver their spaces on time, at quality and on budget.

MIEHLEKETO BRIGHTON BALOYI – CEO

- Master of Technology Quantity Surveying - University of Johannesburg.
- The South African Quantity Surveying Profession – MAQS.
- The South African Council for the Quantity Surveying Profession - IT508.

Miehleketo's earlier development focused mainly on mining and civil contracts, where he has spent time working on projects for leading international mining houses, international Engineering EPCM Companies and Major Parastatals. Miehleketo is now fully experienced in the Quantity Surveying spectrum from Feasibility Studies, Documentation, and Adjudications. Through to Contract Administration and project close outs, his involvement and experience includes bulk earthworks (terraces), heavy civil work, roads, and all mine surface infrastructure.
